## **Cesco is proud to introduce to the Agi market**

---

### **COR Super Gel Concentrate**

Cesco Australia Ltd is thrilled to announce the release of our latest organic concrete remover innovation - **COR Super Gel**. After an extensive 12-month trial period garnering exceptional feedback, we are excited to bring this latest, additional groundbreaking product to the market.

**COR Super Gel** is an intensive, organic application designed to remove more stubborn concrete build-up than just concrete slurry. Our existing concrete remover **COR Daily Wash** is best used for cleaning concrete splash / light slurry situations.

Unlike traditional acidic products, **COR Super Gel** is non-acidic, ensuring minimal impact on both metal and painted surfaces. Its environmentally friendly composition reflects our commitment to sustainability, offering a safe alternative for users and also the planet.

Like **COR Daily Wash**, one of the key advantages of **COR Super Gel** is its ease of use. Designed with convenience in mind, our product simplifies the concrete removal process, making it accessible to a wide range of users. Whether you're a Major owner, LOD or Independent contractor, **COR Super Gel** greatly enhances the task at hand with efficiency and effectiveness through a paint-on application.

**APPLICATION:** *Apply generously undiluted **COR Super Gel** onto light, concrete build up with a broom or brush. Allow to penetrate into build up for a minimum of 10 minutes, until concrete has softened. Do not allow to dry. Agitation may be required, before washing off with gurney or pressure spray ideally. Depending on severity of build-up, a second coat will allow for more aggressive penetration for more effective removal of build-up.*

What truly sets **COR Super Gel** apart is its unique formulation, making it not just another concrete remover but a safe one at that. By prioritizing safety without compromising on performance, Cesco Australia Ltd has crafted a solution that meets the needs of modern consumers and businesses alike.

We are excited to announce that **COR Super Gel** is now available to Major owners, LOD's and Independent contractors in the concrete Agi market. \* Available in 20L Container or 200L Drum.

- **Take advantage of our Introductory Special Rates for October where you can save 15% off **COR Super Gel** normal rates.** We encourage you to place your orders early to save on this groundbreaking safe new concrete cleaning solution.
- Safety Data Sheet & Technical Data Sheet available – on request.
